

Subclipse demonstration instructions

Connecting to a repository that already exists on a SubVersion server

1. Launch Eclipse
2. Switch to SVN Repository Exploring perspective
3. Right click in SVN Repositories panel, New, Repository location
4. Enter `svn://svn.cs.stir.ac.uk/sbj`, Finish, username sbj, password, check Save Password, OK
5. Repository appears in the list – can click + to expand to see folders and files held in the repository.
6. The repository details are remembered, including username and password, for next time.
